Type

Display · Cinzel

Body · Inter

Ingest a case's filings and sort them into the schema you need to analyze the case and fight it.

Tokens & usage

docs/brand/tokens.css ? shadcn/ui semantic variables (light :root + .dark), HSL triplets.

docs/brand/tailwind.preset.js ? Tailwind preset: semantic colors via hsl(var()), the

brand-* scale, font families (display/sans), and radius.

docs/brand/fonts.css ? Google Fonts import (Cinzel + Inter).

shadcn: copy tokens.css into your globals.css (or @import it).

tailwind: presets: [require('./docs/brand/tailwind.preset.js')].

classes: bg-background text-foreground bg-primary text-primary-foreground
bg-brand-gold text-brand-parchment font-display rounded-lg
